

# ENVIRONMENTAL POLICY

The team of the **Centre for Immigration and Integration** is familiar with the conclusions of science and recognizes that human activity affects negatively ecosystems, the climate and public health in many of its aspects. We have committed to reduce the impact of our activity on the environment and encourage responsible attitude by all members of the organization and by its suppliers. Our goal is to reduce CII's impact on the environment to the possible minimum and make sure that the future generations will be able to live, work and play in our common natural environment to a maximum degree with equal access to clean air, clean water, and natural resources.

For our daily operational needs, we aim to identify and buy supplies and services that are environmentally friendly when economically achievable. We strive to reduce to the minimum pollution and waste, save energy and water, protect the habitats, support renewable energy sources, buy eco products and promote environmental transport.

These efforts also count for in our relationships with suppliers and contractors from whom we require compliance with the environmental standards. Everyone's understanding and involvement is an important element of this environmental policy. Separate waste collection is mandatory in our office space. Work exclusively in electronic formats and not on paper is encouraged and printing, when necessary, is always bilateral.

CII monitors and gets informed of the novelties in the Green Transition and the Circular Economy.
